

Challenges:

At GTM Electrical Services Ltd, identifying sustainability challenges has provided opportunities for improvement and innovation within their business. Recording scope 1&2 emissions revealed the industry-wide challenge of financing the transition to electric vehicles, prompting the development of a comprehensive plan. Collaboration with wholesalers continues to determine scope 3 emissions figures.

Reducing waste output has been another significant challenge, mitigated through a collaborative effort with wholesalers to implement a closed-loop recycling system for excess waste. Initially, there were challenges in educating staff and explaining sustainability concepts. However, as awareness grew about the impact of sustainability practices, GTM Electrical Services Ltd's team embraced these principles wholeheartedly.

Impact:

In addressing challenges with resources from the school, GTM Electrical Services Ltd recognised that focusing on key sustainability topics could enhance their operational practices. This approach allows them to showcase to clients and their supply chain that environmental, social, and economic considerations are integral to every aspect of their business operations.

Engagement events:

GTM Electrical Services Ltd sees them as an interesting way to hear other questions which may not have come up for us and think about from another angle.

Resources:

Assessments – GTM Electrical Services Ltd find them good to be able to view their process.

Action Plan – GTM Electrical Services Ltd view it as a useful tool to be able to strategize learning

E-learning modules – GTM Electrical Services Ltd see the modules as very useful for accessing different topics and creating a better all-round understanding of them.

Value gained:

Increased knowledge is invaluable for the day-to-day productivity, efficiency, and sustainability of GTM Electrical Services Ltd. With unrestricted access to numerous learning tools via the sustainability school, the company continues to expand ethically with heightened awareness of environmental, social, and economic factors.

Electrical Installation and maintenance contractor.

About

GTM Electrical is a small electrical installation and maintenance contractor established for over 30 years.

We are a quality driven complete electrical services provider with a first-class reputation as a leading electrical company in Greater Manchester and the Northwest of the UK.

We focus on providing a high standard of service working within the public sector and alongside housing associations.

This enhanced knowledge adds significant value to GTM, including increased employee motivation, attraction of young talent, and reductions in risks and costs. It also provides a competitive edge in tender processes and enables the company to meet or exceed client requirements. Ultimately, this positions GTM Electrical Services Ltd to be future proofed for the long term.

Future proofing:

Despite being a relatively new member of the School, GTM Electrical Services Ltd has fully embraced the partnership across the entire company. They plan to consistently access current information to support their expanding business. Membership in the School is expected to enhance their training programs, benefit staff development, and positively impact their supply chain. This commitment underscores their dedication to driving sustainability forward for future generations.
