

Challenges:

Ozzas Security Systems has undertaken initiatives to enhance its understanding of sustainability through operational modifications. A key challenge faced has been reducing the company's carbon footprint, particularly challenging given the extensive daily travel of engineers. To tackle this issue, Ozzas Security Systems upgraded its entire fleet to Euro 6 vehicles, significantly reducing environmental impact. These vehicles not only emit 25% less CO2 but also achieve 30% better fuel economy. Additionally, the company promotes vehicle sharing where feasible, further decreasing the number of vehicles on the road.

Impact:

Reducing Carbon Footprint - Accessing resources from the Supply Chain Sustainability School has significantly enhanced Ozzas Security Systems' understanding of reducing our carbon footprint. This knowledge has enabled us to minimize our environmental impact effectively.

Assessments - The assessments provided by the Supply Chain Sustainability School have proven straightforward and beneficial for Ozzas Security Systems Ltd. They have helped identify key focus areas within our operations.

Sustainability - We have established a customized procurement pathway that offers targeted training resources for both engineers and staff. This initiative has identified areas for future improvement in reducing our environmental impact.

Improving Sustainability Practices - Utilizing the School's resources allow Ozzas Security Systems to continually enhance our sustainability practices throughout our supply chain.

Areas of Weakness - Action plans provided by the School pinpoint areas requiring improvement and allow us to set clear learning pathways for ongoing development and adaptation.

Value gained:

Ozzas Security Systems has derived numerous advantages from its collaboration with the Supply Chain Sustainability School, including enhanced alignment with client requirements and a strengthened competitive edge. A primary objective for the company has been to deepen its understanding of carbon footprint. Through our partnership with the Supply Chain School, we have achieved this goal while also educating our staff about the environmental impact and its significance.

Future proofing:

At Ozzas Security Systems, there is an ongoing effort to promote the Supply Chain School within the company and with its supply chain partners. The company will continue to utilize the Supply Chain
