

## Challenges:

Advanced Roofing Ltd has faced challenges in capturing, understanding, and regularly reporting data necessary to determine its carbon footprint. Upskilling employees has been a priority and a continuing focus to ensure all operatives have a basic understanding of sustainability. Challenges include best practices on-site and recording data for carbon and water footprinting. Ensuring sustainable techniques and materials are sought out and incorporated where possible into its works remains a priority.

## Impact:

Engaging with the School has facilitated awareness and commitments to change and to further develop in-house processes to track and record the carbon footprint in more detail. Advanced Roofing Ltd has recently launched a campaign internally to promote usage of the portal and encourage employees to utilize services offered by the school.

## Resources:

**Assessments** – These are useful tools to help highlight areas to focus on. They are easy to use and provide a straightforward process

**Action plan** – The Action Plan is very helpful in guiding Advanced Roofing Ltd's focus on specific topics that align with its objectives for the year.

**E-learning modules** - E-Learning Modules have provided employees with free access to resources, enabling unique learning plans. This helps focus the business and promotes continuous professional development (CPD) for all employees.

## Value gained:

Advanced Roofing Ltd has gained numerous benefits from participation in the School. It is helping to shape the company's ongoing goals, and the knowledge gained is aiding in the adoption of sustainable practices and awareness. This participation also encourages a commitment to reducing its carbon footprint alongside introducing water footprint awareness and future reporting. Continued membership is anticipated to bring further opportunities for collaboration, learning, and staying ahead of the evolving sustainability trends in the construction industry.

### Services

We provide specialist roof and cladding services to provide a total envelope solution. We offer stand-alone solutions for roofs or cladding projects or any combinations of our entire range of works which include single ply membrane systems, hot melt systems, cold applied liquid membranes, roof sheeting and cladding, rainscreen facades, roof management, maintenance and refurbishments.

### About

We were formed in 1988 and are accredited with CHAS, ConstructionLine, CQMS, The Building Safety Group (BSG) and registered to ISO 9001, ISO 14001 and ISO 45001. We are members of the NRFC and received their gold award for 2023. Advanced are committed to continuous improvement of our own and our industries health and safety, environmental and management systems. Training is continuously reviewed and monitored from senior management to on-site operatives. Advanced are committed to reducing our carbon footprint and more recently our water footprint.

## Future proofing:

Advanced Roofing Ltd is continuously looking at ways to meet and exceed its sustainability targets. They are exploring ways to externally promote the school. It aims to increase membership within its teams and utilize the resources and learning that the school has to offer.
