

## Challenges:

One of the biggest challenges faced by Clipfine Ltd around sustainability is fully understanding and managing Scope 3 emissions. While significant strides have been made in accurately measuring direct (Scope 1) and indirect (Scope 2) emissions, comprehensively grasping the entire Scope 3 remit remains complex. Scope 3 includes all other indirect emissions that occur in the value chain, which is challenging to quantify due to its broad and varied nature.

To address this, Clipfine Ltd is actively working on enhancing its supply chain management program. By engaging more closely with suppliers and partners, the company aims to improve data collection and transparency, enabling better assessment and reduction of Scope 3 emissions. This initiative is a key part of Clipfine Ltd's commitment to sustainability, as it allows for the identification of reduction opportunities and fosters collaboration on more sustainable practices across the entire supply chain.

## Impact:

Tackling the challenge of understanding and managing Scope 3 emissions has significantly impacted Clipfine Ltd by highlighting the importance of comprehensive supply chain engagement. By refining its supply chain management program, the company has enhanced collaboration with suppliers, leading to improved data accuracy and emission reductions.

Engaging with the School has been instrumental in facilitating these positive changes. The School has provided valuable resources, including training workshops and e-learning modules, which have expanded the company's understanding of sustainability practices. These resources have equipped the team with the skills needed to implement effective strategies for reducing emissions.

Additionally, the School's network has enabled Clipfine Ltd to share best practices and learn from industry peers, fostering a culture of continuous improvement. As a result, the company has not only made progress in reducing its environmental impact but has also strengthened its reputation as a leader in sustainable construction practices.

## Engagement Events:

As an active member of the School, Clipfine Ltd has participated in various engagement events, including supplier days, training workshops, and webinars. The most impactful event was the "Embedding Carbon Reduction into Sustainable Procurement" webinar. This session provided invaluable insights into how other companies are addressing similar challenges related to carbon emissions. Learning about their mitigation strategies allowed

### About

Clipfine Ltd. is a premier provider of construction and corporate support services across the United Kingdom. Established in 1975, our family-owned business has built a robust portfolio showcasing our commitment to excellence, safety, and sustainability. With a headquarters located in central London, we pride ourselves on delivering high-quality, efficient, and sustainable solutions for a diverse range of clients. Our services are underpinned by decades of experience and a dedication to innovation and continuous improvement. Clipfine's reputation is built on our ability to consistently meet and exceed client expectations through meticulous project management and unparalleled expertise.

Clipfine Ltd to adopt best practices and tailor them to specific needs. The webinar facilitated networking opportunities, enabling the company to exchange ideas and collaborate with industry peers facing similar sustainability hurdles. These events have not only enhanced understanding of sustainable procurement but also reinforced the company's commitment to integrating carbon reduction strategies into its supply chain. The knowledge and connections gained from these events have significantly contributed to the company's efforts to achieve its sustainability goals.

## Resources:

**Assessments** - The Assessment section on the School portal has been extremely useful in Clipfine Ltd's sustainability journey. It provided a structured framework to evaluate current practices and identify areas for improvement. The comprehensive assessments allowed the company to benchmark its performance against industry standards and set realistic goals for enhancing sustainability initiatives. Through detailed feedback and tailored recommendations, Clipfine Ltd gained clarity on specific steps needed to reduce its carbon footprint and improve supply chain practices. The assessment process also highlighted the company's strengths, giving confidence in areas where it is already excelling. Overall, the assessments have been instrumental in guiding the sustainability strategy and ensuring the company is on the right path to achieving long-term environmental objectives.

**Action Plan** - The Action Plan feature on the portal has been a valuable tool for Clipfine Ltd. It helped translate assessment insights into concrete steps, enabling the company to systematically address identified gaps in sustainability practices. The Action Plan provided a clear roadmap with prioritized actions, timelines, and resources needed to achieve business objectives. This information has been essential in keeping the team focused and accountable. By following the Action Plan, Clipfine Ltd has been able to implement targeted improvements, such as enhancing supply chain transparency and integrating carbon reduction strategies into procurement processes. As a result, the company has made measurable progress toward its sustainability goals.

**E-learning Modules** - The E-learning modules offered by the School have been highly beneficial for the cross-functional teams at Clipfine Ltd. These modules provide flexible and accessible training resources, allowing staff to enhance their knowledge of sustainability practices at their own pace. The content is comprehensive and up-to-date, covering a wide range of topics essential for the industry, such as carbon reduction, sustainable procurement, and supply chain management. By participating in these modules, team members have gained valuable insights and practical skills that they can apply directly to their roles. E-learning has empowered the workforce, fostering a culture of sustainability awareness and prompting more questions directed at the innovation and business development department. This has led to more informed decision-making and the implementation of effective sustainability strategies across the organisation.

## Value gained:

Being a member of the Supply Chain Sustainability School has brought significant benefits to Clipfine Ltd. It has enhanced the company's understanding not just of sustainability but also of People and Fairness, Inclusion, and Respect (FIR), enabling the development of more efficient and effective processes. By leveraging the resources and networking opportunities provided by the School, Clipfine Ltd has gained a competitive advantage in the industry.

For instance, the improved knowledge of sustainability drivers has helped the company align better with client requirements, leading to increased business opportunities and stronger client relationships. Looking forward, Clipfine Ltd sees the continued value of membership in staying ahead of industry trends, further reducing risks, and continually enhancing sustainability practices.

**Future proofing:**

Clipfine Ltd's future plans with the School include expanding involvement by rolling out the resources to the wider business and establishing site-based Sustainability School Champions. These champions will actively promote the use of the School's resources, ensuring sustainability, people, and FIR remain core focuses across all operations.
